Regarding the following paper:

Title: Radar BEV Free-Space Estimation for Autonomous Vehicles using Doppler-Decoupled Encoding.
Paper: http://vtc2026fall.trackchair.com/paper/49136

Dear Colleague,

On behalf of the Technical Program Committee, we are pleased to inform you that the above paper has been accepted for presentation at VTC2026-Fall.

All submitted papers have been thoroughly, independently reviewed. Based on the original reviewers' comments, this paper is accepted contingent upon:
1) your completion and submission of the camera-ready final version of the technical manuscript for the paper,
2) receipt of the signed copyright form, and
3) your pre-registration for the conference.

All of these items must be done by 30 June 2026. Any extensions of this deadline will be announced on the conference website.

Additionally, the IEEE Vehicular Technology Society requires that each accepted paper be presented in-person at the conference site or virtually according to the schedule published. It reserves the right to exclude from distribution on IEEE Xplore any paper not presented on-site or virtually. If none of the authors are able to attend, only a qualified surrogate may present the paper, and registrations may be transferred free of charge.

A virtual track will be established to accommodate authors who cannot travel to the conference site. Due to potential travel complications, at the time of registration you have the option to select virtual presentation by a main author instead of traveling and presenting in-person.

Camera ready copy must be submitted to the IEEE Conference eXpress Publishing system, as they will be producing the final proceedings.

**** do NOT upload final manuscripts to TrackChair ****

**** Full details for registration and final paper submission upload will be available soon on the conference web site. ****

Visa support can be requested through the conference registration web site. Any requested visa support letters will be issued electronically once your registration is completed.

A limited number of student travel grants are available, and student authors have the option to apply. Visit here for more information: https://vtc2026f-rr-wks.trackchair.com/track/2583

Any additional comments on your paper can be found on the TrackChair site at the URL at the top of this email. When in TrackChair check under "Reviews" for your paper. Please take reviewer comments into account where appropriate in preparing your final manuscript.

Note that it is the VT Society policy that each paper must have either a full IEEE member or non-member registration (not a student registration). Authors submitting more than one paper must pay a full registration for the first paper, plus an extra paper charge for each additional paper.

Thank you for submitting your paper to VTC2026-Fall.
